COMPUTERS, THE INTERNET, AND THE SCHOOL NETWORK

The use of technology in the educational process is essential as part of the schooling experience. We recognize that technologies change the manner in which information is accessed, communicated and transferred will present us with new challenges. The following regulations will help to guide our students and staff to pursue honorable behavior and acceptable use of computers/technology:

Authorized Use Policy

The Warren Glen Academy will offer supervised Internet access to our students only. Since this resource connects millions of computers around the world with no central control, we must hold students responsible for the areas they will be allowed to search. Educators, as well as parents, know that the Internet may contain information that could potentially be offensive to some people, and we will take every step to promote a healthy Internet environment. We review and teach internet safety throughout the school year. Students will be educated about appropriate online behaviors, including interacting with other individuals or social networking websites and in chat rooms, and cyber bullying awareness and response. Every computer will be filtered to ensure the safest environment possible. It is necessary, however, that students be aware of their responsibilities and the consequences that will occur if computers or Internet access is misused. Before using the Internet, each student along with a parent or guardian must abide by the following guidelines:

1. Students will access the Internet for specific academic assignments and educationally related functions.
2. Using technology for illegal activities as outlined in federal and state law.
3. Students will not access, download, nor upload obscene, sexually explicit, abusive, racially offensive, illegal, defamatory or inappropriate material.
4. Students are prohibited from downloading executable files or computer programs.
5. Students are prohibited from willfully introducing any computer virus, disrupting, vandalizing, gaining unauthorized access to equipment, software, files, or operating systems.
6. Students will not delete any files or programs, and not alter any Internet settings.
7. Students are prohibited from duplicating copyrighted materials without the written consent of the owner or licenser.
8. No one is allowed to access common “chat rooms,” developing bulletin boards, chat groups, or email broadcasting.
9. Students are required to receive permission to print anything from the Internet.
10. Students will not use personal email accounts or social media such as FACEBOOK in school.

ACADEMY

11. Students may have supervised email availability for specific school projects. The user is prohibited from forging, reading, deleting, copying, modifying or viewing other user's email or school related instructional student program. Including logging on and using someone else's identity.
12. Students are prohibited from sending harassing, obscene, and/or threatening email, text or tweets to another user during school.
13. Students cannot use school-based technology for personal, financial, or business gain.
14. Violation of any of the rules will result in the consequences at the discretion of the teacher and/or Executive Director. Consequences may include, but are not limited to:
    a. Cancellation of access rights for a period of time (such as the remainder of the marking period or school year) to be determined dependent upon the severity of the violation.
    b. Out of school suspension/remediation, or in-school suspension/remediation, or reflection restoration for a period of time to be determined upon severity of the violation.
